Employment History

Technical Project Manager & QA Lead at Octopus Digital

June 2024 — Present

- Led multiple dev initiatives aligned to product strategy
- Oversaw company-wide scheduling, resource planning, and task prioritization
- Led release planning and risk mitigation to ensure stable, on-time deployments
- Collaborated in technical planning and architecture discussions with development leads
- Built UI test automation using Cypress; contributed React/TypeScript fixes to unblock delivery pipelines
- Developed estimation and release workflows, and optimized meeting structure
- Coordinated with internal stakeholders and external partners to align project timelines, expectations, and deliverables

Technical Project Manager & QA Lead at Matter of Form

December 2021 — June 2024

- Bridged communication between UK stakeholders and remote developers to align design, planning, and delivery
- Led QA strategy including test planning, initial SEO checks, and accessibility reviews
- Authored technical documentation and specs, improving dev clarity and velocity
- Oversaw release schedules, risk management, and regression workflows
- Conducted accessibility audits (WCAG) and enforced SEO compliance guides
- Handled frontend fixes using React and TypeScript to resolve delivery blockers

Senior QA Analyst at Matter of Form

October 2021 — December 2023

- Directed QA lifecycle across projects, ensuring pixel-perfect delivery
- Built internal QA process framework and documentation
- Created full test plans and cases in TestRail; executed functional, UAT, and regression testing
- Performed Cypress-based UI testing, API tests in Postman, and load testing in Locust (Python)
- Developed accessibility and SEO best-practice guides adopted across teams
- Delivered rapid bug fixes and enhancements in React and Tailwind

Junior Project Manager at Cognitive Creators

November 2020 — October 2021

- Managed daily project operations, sprint delivery, and team reporting
- Created Due Diligence reports and worked with clients from various industries
- Delivered and maintained internal and external project documentation

QA Analyst at Cognitive Creators

January 2020 — October 2021

- Performed manual and automated quality assurance processes to ensure the final product met business requirements
- Logged and handled issues throughout the software development life cycle in accordance with Agile methodology
- Defined the internal quality assurance process, creating and maintaining internal QA documentation
- Set up test automation with Selenium, implementing regression testing with Python and third-party tools

Digital Marketing Specialist at Árukereső, Budapest

September 2018 — October 2019

- Managed Google Ads and Facebook Ads campaigns in order to reach the goals of the SEM projects
- Monitored the SEM performance and providing detailed report to the management
- Conducted market research with various tools, in order to identify market opportunities for business growth

IT Service Desk Analyst at Avis Budget Group, Budapest

April 2018 — September 2018

- Technical support and troubleshooting for the company employees in any IT related issue (hardware, software, network)
- Administrating the internal software of the company
- Master incident monitoring and escalation handling

Level 2 Escalation agent for Motorola - Lenovo at Sykes, Budapest

September 2017 — April 2018

- Handling technical escalation from Level 1 agents, offering solutions for the client
- Providing feedback, training, and monitoring for the Level 1 agents

Customer Support Representative for Motorola - Lenovo at Sykes, Budapest

June 2017 — September 2017

- Technical support and troubleshooting for the customers in English, Romanian and Hungarian

Technical Skills

- Project Management: Jira (advanced), Confluence, Asana, TestRail
- Agile Delivery: Scrum, Kanban, sprint planning, stand-ups, retrospectives
- Documentation: Release notes, functional specs, reports, test plans
- Frontend support: React, TypeScript, TailwindCSS
- QA and Automation: Cypress, Postman, TestRail, Locust
- CI/CD and Version Control: GitHub, pipelines, release orchestration
- Accessibility and SEO: WCAG, SEO technical audits

Core Competencies

- Cross-Functional Leadership: Led Agile teams across QA, frontend, and devops in remote setups
- Client-Centric Communication: Regularly interface with stakeholders to align goals and manage expectations

- Strategic Planning & Prioritization: Skilled at defining tasks, estimating workloads, and tracking deadlines
- Proactive Risk Mitigation: Identify roadblocks early and initiate resolution paths to maintain velocity
- Multicultural Collaboration: Fluent in English, Hungarian, and Romanian; effective in global team dynamics
- Continuous Improvement: Introduced process refinements in QA, project planning, and delivery pipelines
- Meeting Facilitation: Run daily stand-ups, retrospectives, and client demos with clarity and focus
- Mentorship & Team Growth: Support junior PMs and QA team members with on-boarding and skill development
